

# Junior Year Timeline

## July/August

The summer before junior year can be a great time to add to your resume. Look for an internship or volunteer work in your area to add to your skills set.

## Sept/Oct

Complete a strengths assessment to see where your interests lie. Some majors have high school coursework requirements, so make sure you're taking the right classes.

## Nov/Dec

Now is a good time to start discussing your Expected Family Contribution (EFC). Knowing your budget will guide the building of your university list. You can find EFC calculators online.

## Jan/Feb

Time to start researching universities and build your shortlist! It's important to check registration dates for the Spring SAT/ACT if you're planning to complete those exams.

## March/April

Need something to do over April vacation? Use this time to visit the campus of a university you're interested in if you can! If not visit a local college campus to get a feel for college life.

## May/June

If you've received your SAT/ACT scores and plan to take the test again, check the registration deadlines. Summer is a great time for some campus visits too!

Concourse Global connects you to a team of expert counselors with decades of experience in top high schools worldwide. Their insider knowledge and expert guidance can help you crush the college application process. From building your short list to helping you understand your Expected Family Contribution, let us help you find your brightest future.
